EMPLOYMENT

INTERNS.LA · Software Engineer

Los Angeles, CA · Oct. 2019 to Current

interns.LA is a web app that fills the gap between high-growth companies and local talent while providing a high level of accountability and transparency for internship seekers. Employed ReactJS to build the web app along with .NETCore framework for data management and SQL Server for data storage.

- Worked closely with the on-site manager & team to collaborate, brainstorm, and analyze business requirements
- Architected and managed SQL tables, stored procedures needed for back-end infrastructure
- Utilized AWS S3 to implement file upload on server-side in C#
- Built email confirmation service that utilized Sendgrid API
- Implemented Drag-N-Drop, sorting, filtering, routing and mapping components for enhanced user experience
- Created and implemented reusable React components
- All operations were created utilizing ReactJS and linked by C#/.NET services and RESTful Web API controllers
- Participated in the agile software development process and code reviews
- Created CMS to allow organizations to add new Events for recent grads to attend
- Built site features in a fast-paced and high throughput environment
- Implemented responsive HTML layouts based design mockups provided by our UX/UI Designer
- Aided in creating Google Maps API - implemented a feature for users to view their walking distance and map route
- Created and built the whole UI Interface for our site, including Landing and Contact Page

CREAMISTRY · Manager

Menifee, CA · Aug. 2015 to Sept. 2019

- Managed 20 employees across 2 locations
- Organized inventory and product distribution
- Led the hiring process and onboarding process for new employees
- Oversaw financial account and communication franchise owner
